Stanford Exposure to Research and Graduate Education (SERGE) is dedicated to enhancing Stanford’s demographic representation within the School of Engineering (SoE). Attendees will experience graduate life at Stanford. Through engaging with current students and faculty who share similar research interests, we invite students to envision Stanford as a prime institution for their development as a researcher and person.

We are looking for competitive rising seniors who are seriously considering pursuing a graduate degree within one of Stanford’s engineering programs. Students from historically underrepresented (in STEM careers) and disenfranchised groups are most encouraged to apply. To apply to SERGE, visit the SoE Engineering Diversity Programs website. The deadline is August 15 and selected participants will be notified by August 31.

SERGE will take place on the 11th and 12th of October 2018 at Stanford University. Check the BEGSA website for more details. As an added benefit, SERGE attendees will also participate in Graduate Pathways to STEM (GPS) on October 13. GPS is a program that focuses on strengthening graduate school applications. Travel and accommodations will be provided for selected students.
